

The Chester COVID-19 Vaccine Assistance Project is now prioritizing those who are neurodiverse to get their vaccine scheduled. Their team will help you navigate the complex system to schedule your appointment and is being offered to all Deep River residents, 16 or above, who meet the criteria (or their parents). Through a trained volunteer network they will provide whatever level of support is needed to get you all set up - from basic coaching to scheduling the appointment for you.

Kimberley Megrath and Jane Moen will lead this session and from there you'll be on the path to getting that appointment all set. Please click the link below to sign up for this session.
